7. The following is an examiner's statement of reasons for allowance:

a. **With respect to independent Claims 1, 16 and 31, and their dependent claims, the prior art of record does not disclose** "wherein a set-up program code associated with each of the objects of the updated object group is stored in said terminal storage device, and wherein said mobile terminal in executing each of the objects of said updated object group installed in said terminal storage device converts each updated object into a program code which comprises a form of using each updated object on said mobile terminal, and sends to said information processing server a malfunction report representing each updated object suffering from said malfunction based on a result of collation between said program code and the set-up program code" **in combination with** a server having a plurality of objects, each of which having a unique URL, a mobile terminal sending an install request including the URL and object necessary for installation, wherein the server refers to an install list and a list of unneeded objects which it sends to the mobile terminal along with the selected object, wherein the mobile terminal deletes the unneeded objects and sends a recovery request to the server, wherein the server forms a list of unneeded restoration objects. Examiner finds these independent claims to be novel and non-obvious over the prior art of record.

b. **With respect to independent Claims 3, 18 and 33, and their dependent claims, the prior art of record does not disclose** "wherein a set-up

program code associated with each of the objects of the updated object group is stored in said terminal storage device, and wherein said mobile terminal in executing each of the objects of said updated object group installed in said terminal storage device converts each updated object into a program code which is a form of using each updated object on said mobile terminal, and sends to said information processing server a malfunction report representing each updated object suffering from said malfunction based on a result of collation between said program code and the set-up program code" **in combination with** a server having a plurality of objects, each of which having a unique URL, a mobile terminal sending an install request including the URL and object necessary for installation, wherein the server refers to an install list and a list of unneeded objects which it sends to the mobile terminal along with the selected object, wherein the mobile terminal deletes the unneeded objects and sends a recovery request to the server, wherein the server forms a list of unneeded restoration objects. Examiner finds these independent claims to be novel and non-obvious over the prior art of record.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
